Stage space

Minimum: 6m x 7m

Ideal: 10m x 12m

The set-up of the space and the artist's make-up are part of the show, however it will be necessary for the artist to check the sound system prior to the start of the show.

Sound

ImproLocura is a show with total autonomy in sound although it would be ideal to be able to connect our device to a system supplied by the organisers in case of larger spaces and with a larger number of audience.

It is desirable that the organisers provide an additional sound system and connection to electricity through a normal 220V socket to power the microphone receiver with large jack nput (6.35mm).

Scenography

If you have any technical questions, please contact the artist directly.
